## 1. Executive Summary

### The Essence of Business: Relationships

Within the realm of business, forging connections and broadening one's outreach are pivotal steps toward elevating the bottom line. This not only amplifies market visibility but also paves the way for entrepreneurs to connect with peers, fostering a camaraderie that can be a beacon during challenging times.

Networking encapsulates the art of building reciprocally beneficial bonds with fellow business professionals and potential clientele. The benefits of business networking are immeasurable, stemming from interactions with individuals within or affiliated with your industry.

Beyond merely expanding a client base, networking provides small business owners with a haven—a space where they can share, discuss, and navigate the multifaceted journey of entrepreneurship. It acts as a catalyst to spark fresh ideas, resolve hurdles, conduct market research, and so much more. Tapping into the wisdom of those who have trodden similar paths before committing resources can be a game-changer.

Networking carves avenues for potential collaborations, joint ventures, or unveiling novel growth trajectories. Irrespective of the business's scale or sector, forging alliances remains at the heart of achieving success. From fleeting yet impactful interactions to lasting partnerships, these connections underscore success in business. It's a testament to the age-old saying, *"It's not just about what you know, but who you know."*

## 2. The Challenge

Venturing into the realm of international networking can be daunting, especially without familiar faces in foreign territories. The question that emerges is, how can one craft a reliable network of business associates beyond one's local domain?

A more active platform translates to heightened value for the Global Click ecosystem, further amplifying the intrinsic worth of the **CLICK** token.

Thus, the more you engage, the more you not only earn for yourself but also contribute to the platform's overall value proposition. In this win-win dynamic, these accumulated points

can be seamlessly converted into **CLICK**, ensuring that members' active participation is met with both intangible satisfaction and tangible rewards.

- **Affiliate Program**

Embracing the motto, “The Platform That Made Success By You, For You”, our affiliate program is a gateway to exponential growth and financial rewards. Members are incentivized to promote Global Click to business peers and friends. In recognition of their efforts, new affiliates are greeted with a **CLICK** token airdrop, enhancing their introduction to the platform.

But the benefits don't stop there. As Global Click flourishes and the **CLICK** token finds its way to public trading, early members stand to reap significant rewards. Their foundational role in building and endorsing the platform can lead to notable financial gains from the public trading of **CLICK** tokens.

Plus, the affiliate program itself offers members the potential to make good money. This comprehensive benefits system not only fosters deeper member engagement but also significantly bolsters Global Click's brand visibility and overarching success.

### **3.2. Opportunity and Future Endeavours.**

As per 2021 data from DataReportal, a staggering 4.33 billion individuals globally are active social media users. This impressive number accounts for over 55% of the global population and encompasses more than 90% of the world's active internet users.

Given the expansive reach of social media, the potential of Global Click is immense. With millions joining our platform, we're poised to amass a vast database of active, verified users spanning various industries, demographics, behaviours, and regions. In today's digitally driven era, such databases aren't just repositories of information – they're invaluable assets, pivotal for the success of contemporary businesses.

Looking ahead, our monetization strategy for this prized asset is rooted in the innovative realm of blockchain. We plan to tokenize our member-centric platform tailored for business networking and referrals through an Initial DEX Offering (IDO). At its core, blockchain-based tokenization involves transforming tangible or intangible assets into tradable digital tokens. This approach not only eradicates geographical constraints and middlemen but also paves the way for asset fractionalization, making investment opportunities accessible to a wider audience.

The IDO serves a dual purpose. Firstly, it allows Global Click to harness the inherent value of its member-centric platform tailored for business networking and referrals. Simultaneously, it's a gesture of gratitude towards our community, offering a means to reward those instrumental in the platform's growth. The funds generated from the IDO will be channeled back into Global Click, fuelling its evolution and elevating its market presence.

## 4. Introducing **CLICK** Token

The **CLICK** token is founded on the BEP-20 standard, a prominent token standard under the Binance Smart Chain. It's an extension of the widely recognized ERC-20 token standard from Ethereum. Given its foundational design, **CLICK** enjoys compatibility with both Binance Chain's BEP-2 and Ethereum's ERC-20 standards.

Designed with purpose, **CLICK** is specifically forged to serve as the native token for the Global Click platform. It plays a dual role: facilitating various services on the platform and functioning as an internal currency. Users can seamlessly exchange the **CLICK** tokens they possess for a myriad of products and services within the Global Click Social Networking ecosystem.

In essence, **CLICK** emerges as the pivotal "currency", universally acknowledged and utilized within the Global Click platform's ecosystem.

### 4.1. Tokenomics

The Issuance of **CLICK**.

**CLICK** boasts a capped supply of 20 billion (20,000,000,000) pre-mined tokens. Its rollout is segmented into three strategically crafted stages, each tailored with precise goals in mind. At the heart of our objectives is the priority to cultivate a community that amplifies the platform's value, subsequently enriching the worth of **CLICK** tokens. This architecture is aimed at bolstering both trust in **CLICK** and its pricing methodology.

Stages of Issuance:

1. Pre-issuance (airdrop)
2. Pre-sale
3. Public sale

### 4.2. Pre-issuance - Airdrop

Platform Users – 40%

During the pre-issuance (airdrop) phase, a total of 8 billion (8,000,000,000) **CLICK** tokens are slated for distribution. These will be segmented across 40 tranches, each encompassing 200 million tokens. Notably, as we progress through the tranches, the distribution quantity of **CLICK** tokens will taper off.

The central objective of this phase serves a dual purpose. Firstly, it's to extend our gratitude to the participants joining the Global Click business networking and referral platform, accessible at [www.globalclick.online](http://www.globalclick.online). Their active involvement and engagement play a pivotal role, as they help amplify the platform's value, enhancing user experience and content quality. Secondly, this initiative is also designed to strengthen and elevate the visibility and reputation of the Global Click brand.
